

What's Possible?

Identify and evaluate research areas instantly

- Find and profile high impact researchers, opinion leaders, and centers of excellence
- View existing physician networks
- Create and apply identification criteria in real-time
- Import identified KOLs into OpenQ's Engage as well as 3rd party applications

Who's It For?

- Drug Discovery Groups
- Medical Science Liaisons
- Medical Communications
- Product Teams
- Medical Affairs
- Clinical Research

Answers at our fingertips

Connect your desktop to the broadest set of data available for tracking research and clinical activity. Instant searches bring instant results and answers to the critical questions you need to plan your next event, trial, or line of research.

Looking for the best, the most active, the up and coming?

Find the most prominent physicians as well as the rising stars in each field. Avoid sifting through reams of irrelevant data and get right to the heart of the matter with OpenQ's crystal clear data analysis, reports, and influence maps.

Complex information management, solved

OpenQ's proprietary indexing technology brings together multiple sources into one unified database which can also include customer-proprietary information.

A circular image showing a screenshot of the OpenQ database interface. It displays a table with columns for Name, Institution, Country, and Date. The table lists several researchers and their affiliations, along with their countries and dates of activity.

Example Reports and Analysis:

- Clinical trial activity
- Up-and-coming investigators
- Geographic research hot spots
- Highly cited articles
- Top journals
- Top KOLs
- Emerging research areas
- Opinion leader profiles

Accessible anywhere

Your Discover solution travels with you. Whether in the office or on the road, the answers you need are only a couple of clicks away.

Collaborate with colleagues, view networks

Want to get behind the charts and graphs? See who is connected to whom and how with OpenQ's innovative network analysis module. View the individual physician networks and apply filters on the fly.

Instant alerts

Want to stay up-to-date with the latest changes in your field or the key players in it? Create alerts that are delivered to your inbox and be instantly notified of the changes in the market as they occur.
